

# WEIGHTLOSS PROGRAM

Weight loss doesn't mean just losing weight. We take it as a joint effort, which will make you feel healthy, disease free and fit from inside out with least chances of relapse. We focus on 4 aspects- Healthy and balanced nutrition, enough exercise, stress management and good sleep. Eating less causes the BMR to slow down which results in weight loss plateau or weight regain. Unlike all other diet plans you will find online, this is a complete and long-term weight loss solution. We will provide everything you need for long-term success in building healthy and sensible lifestyle with practical dietary changes.

## What to Expect

- Manage symptoms in a better way: Learn how to manage various symptoms like low energy levels, fluctuations in weight, constipation, poor skin and hair health, hormonal imbalance, and much more through your customized plans, exercise, stress management and adequate sleep.
- Our previous clients have reversed thyroid and are now leading a healthy life. We work on building metabolism and insulin resistance with the diet and exercise regimen designed by Dietitian Gagan. You will see weight loss, fat loss and inch loss with enhancement in skin and hair texture.
